## ZR-80/ZR-85/ZR-90

CAMCORDERS

10

### ZR-85 and ZR-90 Step-up Features

#### **Simultaneous Photo/Video Recording**

- ◆ While recording video, the ZR90 and ZR85 are able to simultaneously capture VGA quality (640 x 480 pixels) digital photos onto a memory card. This is perfect for those who want to capture e-mail ready photos, without interruption.

#### **Selectable Focusing Points**

- ◆ Sometimes, the subject you want to photograph is not in the center of the frame. Choose from one of three focusing points to automatically put the subject you want into sharp focus.

#### **A/V Insert and Audio Dubbing**

- ◆ A/V Insert lets you insert new scenes of video from your VCR or other camcorder on to a tape recorded in the SP mode.
- ◆ Audio dubbing function lets you add narration or stereo sound to a recording made in the 12-bit audio mode

#### **High Resolution Photos**

- ◆ The ZR-85 and ZR-90 capture beautiful high definition photos. Just press the photo button to capture stunning XGA (1024 x 768 pixel) images onto the included 8MB SD Memory Card.
- ◆ For added flexibility, you can select the compression size (Superfine/Fine/Normal). You can select how long you wish to review a still image after recording.

#### **USB Terminal**

- ◆ Allows high-speed transfer of images from your SD Memory Card or MultiMediaCard to your computer. By using the USB cable and software provided, you can process and organize your images on your PC.

#### **Included Software**

- ◆ Bundled with ZoomBrowser EX (WIN) and ImageBrowser (Mac) image management and editing software. Easily download, browse, archive, and retouch your photos. Automatically re-size images and attach them to e-mail, arrange them for printing, and add text.

#### **SD Memory Card and MultiMediaCard**

- ◆ The ZR-85 and ZR-90 expand video possibilities with a built-in slot for an SD (Secure Digital) Memory Card or a MultiMediaCard, in addition to a MiniDV cassette. Easily transfer images to your PC directly from the camcorder using USB and IEEE1394. Produce effects not possible with just a cassette using the Card Mix Effects. Choose one of the sample images provided on the supplied SD Memory Card (such as picture frames, backgrounds and animations) and combine it with the live video recording.

#### **Motion JPEG Recording**

- ◆ The ZR-85 and ZR-90 allow you to record movie clips in Motion JPEG format onto the memory card, for clear images and smooth playback. You may choose to record in 320 x 240 pixels or 160 x 120 pixels. Best of all, you can record for the full length of the SD Memory Card\*. If you like, you can even copy video from the Mini DV tape to the card, making it easy to attach a mini-movie to an e-mail or post on the web.

\* Max. 60 minutes (512MB SD Memory Card). When using MultiMediaCards, movie clips are limited to 10 seconds in 320 x 240 and 30 seconds in 160 x 120.

#### **StitchAssist**

- ◆ By using the StitchAssist Mode, you can create magnificent panoramas. Shoot your landscape, and transfer them to your computer. Then simply select and arrange your images in the correct order, and the supplied PhotoStitch software does the rest, aligning, overlapping and cropping the separate images to form one ultra-wide panoramic still image.

#### **Picture Transfer Protocol (PTP)**

- ◆ The ZR-85 and ZR-90 support Picture Transfer Protocol (PTP) that enables data communication with a computer without the need to install dedicated driver software. This direct link enables the computer to access the camcorder as though it was an external card reader. This feature is available only with computers running Windows XP or Mac OS X (version 10.1 or later) operating systems.

#### **Direct Print Choices**

- ◆ They offer flexible connectivity with a variety of printers. You can connect them to a PictBridge compliant Canon Card Photo Printer or Canon Bubble Jet Printer. A single cable connects the printer to the ZR-85 or ZR-90 and all printing options can be controlled from the camcorder's menu. Choose from a range of different paper sizes with options for borderless or bordered prints. The ZR-85 and ZR-90 can also connect to any PictBridge compliant printer.
- ◆ The ZR-85 and ZR-90 support Exif Print (2.2), a worldwide standard that enhances communication between digital cameras and printers. At the time of shooting, vital camcorder settings and scene data are recorded with the image, resulting in realistic and reliable color reproduction. Poor lighting or mistakes can also be corrected, allowing photos to be even better than the originals.
